### RESPONSE TO OFFICE ACTION

Dear Sir:

In response to the Office Action dated 03/03/2004, Applicant submits the following amendments and remarks.

#### AMENDMENTS TO THE SPECIFICATION

Please amend the first full paragraph on page 2, lines 7-15, as follows:

To provide heat dissipation means and EMI (electro-magnetic interference) protection for the circuitry of the transceivers, the transceivers are enclosed in packages. The main subject of this invention is the XFP (10 gigabit small form factor pluggable module) package that includes, per MSA (Multi Source Agreement) standards, a set of EMI dissipation fingers. The subject fingers are referred to as the intermediate rear EMI gasket in XFP MSA 2003, drawing Fig. 40. The gasket presents an additional component that must be assembled when constructing the package. In addition to the time and expense represented by this assembly process, the junction of the gasket with the main body of the transceiver cage represents an area of potential mechanical failure.
